

**You're driving financial innovation.**  
Let us handle the infrastructure.  
**SITEPRO**

## We're partnering with Bitcoin mining facilities to:

Create intuitive customizable solutions for **intelligent operations automation**.

**Reduce operational PUE** through actionable data and trending analysis.

Address **privacy and security concerns** with access control and real-time camera feeds.

**Maximize power efficiency** with real-time remote control and turn off/on capabilities.

Detect and **deflect cyber attacks** on critical operations.

Provide **primary and secondary electrical** installation to streamline facility build.

We revolutionized automation in energy and municipalities. As the world's power, finance, and technology priorities evolve, so do we. Our patented platform is a natural fit with the needs of today's responsible, future-forward Bitcoin miners.

Our cutting edge stack involves partnerships with Microsoft & Redis. High-value infrastructure deserves high-value security, so SitePro provides regular updates to the software and hardware ensure that your facility remains secure.
